

How to Install Node.js on Windows

How to Download & Install Node.js on Windows

1. Visit the official Node.js site and download the Windows Installer (.msi) - choose the LTS version.
2. Run the installer - accept license, choose components (include npm), and click Install.
3. (Optional) Add developer tools for compiling native modules if prompted.
4. Once complete, click Finish.
5. Open PowerShell/Command Prompt and run:

`node -v`

`npm -v`
